"The outlines of Puerto Rico's growth as a community through four centuries scarcely appears in this tremendous collection of anecdotes, extracts from diaries, personal comments on everything from the treatment of sinos to Hiroshima, and disquisitions on the philosophy of government. The book is hard to follow as there are no chapter headings, and no guideposts aside from the purely chronological development of events. . . This reviewer is exceedingly puzzled as to how the volume can possibly mean anything to the average reader in the United States. Only a previous knowledge of Puerto Rican affairs, and above all of its personalities, makes the story intelligible. There are literally hundreds of characters in the volume and no clue to their genealogy. . . The book has one very important virtue. For the first time perhaps, a writer attempts to fit the Puerto Rican problem into the larger scene of the entire West Indies." Richard Pattee

"Dr. Tugwell's observations on world affairs, his cryptic estimates of public men and his irritation with self-seeking politicians are interesting and well told. But the story of the people's movement in Puerto Rico, which he touches upon all too lightly, and then usually only as incidental to his difficulties with politicians on the island and in Washington, remains unwritten. He should tell it. Nevertheless, 'The Stricken Land' is interesting if lengthy reading, especially for those who desire intimate glimpses of the Roosevelt regime. Dr. Tugwell, sometimes caustic, sometimes a bit plaintive and disappointed, is one of the nation's foremost political planners. This somewhat random account of a planner's experiences in a free economy is instructive reading." M. P. Akers

"It is an excellent case study in government. The author combines a scholarly grasp of the science of administration with the politician's ability to fuse theory and practice. He brings into sharp focus, too, the contrast between the humanitarian aims of the 'true liberal, and

the self-seeking that so often cloaks itself under the name of conservative. . . Mr. Tugwell's style is literate, as might be expected from a college professor, yet it scarcely is more than adequate. The author uses subordinate clauses with an abandon that is tiring to the pursuing listener. He scatters pronouns with a profusion that makes it difficult to identify their subjects. . . Mr Tugwell came home to a professorship at the University of Chicago. Whether he came home with his shield or upon it only the sequel can tell. But that he fought a good fight, with a personal integrity that even his bitterest enemies could not impugn, is evident to anyone who knows anything of the stricken land." L. J. Trese

"This is an important book that few people not deeply concerned with the problems of Puerto Rico will have the patience to read. Mr. Tugwell has a lot to say of his stormy Governorship—but he has no gift for dramatic conciseness and the text runs to some 750 pages of painstaking analysis of the problems, the achievements, and the difficulties of his regime. There is little of personal flavor—little color (though one gets some feel of the land and its people). . . A difficult book to read; its value will lie chiefly in its reference record."

"The Stricken Land' is ostensibly Rexford G. Tugwell's account of his experience as Governor of Puerto Rico. In this respect it is long, sprawling and self-centered, written with a profusion of detail which can be of very absorbing interest only to students of Puerto Rico or to specialists in United States colonial policy. But the author's concern constantly spills over the nominal bounds of his subject; and his many excursions, flashbacks and side glances cast vivid and searching light on the New Deal, its leading personalities, its hopes and its failures. Indeed, the passages on the issues of American democracy contain enough really serious comment, sporadic and inconclusive though it may be, to make it a document of considerable significance for American liberals." But 'The Stricken Land,' while giving in full detail the history of American administration and of American policy in Puerto Rico during the past decade, is far more than a mere recital of the series of swift-moving events which crowded the Puerto Rican scene during the war and post-war period. The book gives at the same time invaluable sidelights upon the policies and man-

ner of being of President Roosevelt's Administration by one of the two or three individuals most responsible for the shaping of the original New Deal. It presents an exceptionally keen and searching analysis of the fundamental trends in recent colonial policy in the Caribbean, and the story of the genesis of that experiment in international cooperation designed to improve the condition of life of dependent peoples known as the Caribbean Commission."

791.4 Moving pictures 47-3434

"An investigation and exploration into the root and rudiment of the artifices, and moral and psychological adaptations of the moving pictures. In terms of actual performances, actors and actresses, this is a record of what has been happening (sequel to earlier Hollywood Hallucination) in current moving pictures. Discussing voice, narcissism, comedians, social relationships, the merging of unreality with neurotic reality, identifications of artifice with intuitive rightness, this is an interpretative probe and analysis of the relation of mythology and literary symbolic validity, to moving pictures today, specifically and in general, by a deep-digging cinema addict." He is willfully unsystematic and meets criticism with 'Granted, so what?' Nevertheless, he is one of the most interesting writers on the movies in America today; and even his impressionistic method (or lack

of method) may be justified as an ironical admission of skepticism in a field where the scientific tone would be merely a pretense." Eric Bentley

"There has been so little intelligent thinking about films put between the covers of a book that we are apt to become almost too effusive in hailing each addition to that brave little corner of our libraries. . . Mr. Tyler goes to the movies and finds shining down on him from the silver screen not the film that Hollywood has produced but a picture of himself and of his fantasies. . . Mr. Tyler, however, is simply tiresome when he insists on retelling Hollywood's stories to conform to his dreams. No less irritating are his frequent assertions of generalities as fact—wishful dreaming. And mildly vexing is his style, one that tends to obscure what he is trying to say, often simply because there is so much that he wants to say about it. But, for all that, Magic and Myth of the Movies offers the reader a new film world once he has wearied of taking his movies straight." A. R.

In addition to the tremendous adventure itself, he humanizes his material by lighting up the individuality of the climbers, Norton, Somervell, Odell, Smythe, Shipton, Wager, Harris, Bruce and the rest. . . The problems of the mountain—acclimatization, the use of oxygen, the size of expeditions, the political, philosophical and physical aspects—are also thoroughly discussed with all the zest and controversy of a meeting of the Alpine Club. This is the shriving away of the soul's dross by climbing great thrusts of stone. Here Mr. Ullman is frustrated: the writings on which he must depend are articulate only up to a certain point. His quiet Englishmen know the sublime, but cannot utter it. No parables come from them to universalize their experience. "Fritz von Unruh calls his work a novel and it is a novel in the same sense that 'The Brothers Karamazov' is, or 'War and Peace'; and it is both like them, and unlike, in many ways. Like Tolstoi's great literary panorama its central theme is the folly and waste of war. . . Sometimes Unruh's people remind you, not of other living men or men in other books, but of the mad figures in a painting by Breughel or by Bosch. And yet, always, you feel their pulse-beat." (Chicago Sun Book Week) The story on the surface is that of a young Polish dancer who is commanded to dance before Hitler. She steals his famous Will, and the story of horror and violence follows.

"It is disturbing to hear an author like Ernst Jünger called a mercenary when, whatever his earlier mistakes, he had the courage to write the strongest condemnation of the Nazis under the very nose of the Gestapo and the noose of the gallows of the Volksgericht. And herein lie Unruh's shortcomings; he is a spouting volcano of tremendous imagination and poetic power but the lava of his creative ability buries everything within reach of the object of his scorn under its glowing masses. His injustices are, frankly, maddening; his quips against the Church sometimes (but not always) unjust, his visions frequently obscene, his language bordering on the blasphemous. Yet there are two things which reconcile us to his faults, his honest Christianity and his creative genius." Erik v. Kuehnelt-Leddihn

"Reading 'The End Is Not Yet' may stir conflicting impulses; to thrust the book far out of sight, or to carry it to some quiet spot to read again, at once. It is only when the fantastic epic is followed to its exalted end that you realize what the author has done—weaving the entire political, religious and emotional pattern of the age that spawned Adolf Hitler, which is the age in which we live, and in the same web tracing the outlines of an age of peace. The book is an affirmation of the sacredness of life and the value of individual goodness; but it builds upon a bristling base." E. J. R. Isaacs

But, despite the fact that he stalks his prey with an implacable frankness which will scare off many readers, Unruh has not written a tragedy. There is sweetness in his writing, quite like that of a rose on a desolate battlefield. USHENKO, ANDREW PAUL. Power and events; an essay on dynamics in philosophy. 301p \$3.50 Princeton univ. press

110 Philosophy. Metaphysics. Perception
A46-5110

"A study in the foundations of philosophy, this book involves an attempt to establish, systematically, a point of view from which the significant insights of the classical and romantic metaphysical traditions are retained, and are integrated in an empirical philosophy based on the category of power and its many manifestations. A major part of the book is devoted to the task of demonstrating that power is an observable entity, and must therefore be reckoned with in any inquiry which pretends to be an adequate analysis of experience. In an effort to illustrate this thesis, various philosophical issues, such as the problem of truth, causality, induction, art, and the status of logical principles, are discussed and analyzed in terms of the notions of potentiality and actuality or power." "P. D. Ouspensky, who is known for his works of philosophical speculation, 'A New Model of the Universe' and 'Tertium Organum,' turned to the novel form in 'Strange Life of Ivan Osokin' to expound his doctrine of temporal recurrence. He believed that everything in life repeats, and in order to change the cycle a man must first change himself, a feat of character of which, generally speaking, he is incapable. Ouspensky confines himself to Ivan's personal affairs, and makes only very general references to larger circumstances. . . But an individual obviously cannot go back and live his life over, with however slight differences, without changing history, unless the entire external world of causative interrelation with other persons is merely Maya, or illusion." The beginning of an autobiography, which was interrupted by the author's death. It brings his life, in point of time, up to his grammar school days, but gives a picture of the life and times of his beloved city of Rotterdam for a much longer period. "The 'Report' shows that Hendrik Willem was continuously waging one war or another and that he started the good fight as early as the time when as a mere boy in knee-pants he attended the famous Latin School on the Coolsingel in his native city." "Death interrupted Dr. van Loon in the writing of this work which, it may be safely said, promised to become a generous and monumental review of a life full of personal, political, cultural and romantic interest. As it stands, the present slight volume is merely an introduction, both enchanting and erudite, to the vast enterprise the Doctor had in mind: the writing of a sample of what the French so aptly call 'la petite histoire,' that is to say, a revealing sidelight on the course of history set in the framework of a personal chronicle. VAN NARVIG, WILLIAM, pseud. See Lucas, W. O.

VAN NESS, LILIAN. The indifferent blade. 303p \$2.75 Doubleday

47-4399

Psychological novel portraying a marriage and the growth of character in each of the partners. Andrew Suvaroff, a Russian-American architect, married Catherine Calhoun, charming daughter of a famous sculptor, and they were ideally suited to each other. When Andrew, innocently became involved in a scandal, his wife stood by loyally, and saved him, not counting the tragic cost to herself. The scene is largely New York and a summer home in Vermont.

"The author has a feeling for language cadences and has mastered an impressionistic narrative style which gives full play to her deep emotional perception and sensitivity.

Where she fails is intellectually. No positive philosophy beyond a vague humanitarian ideal seems to motivate the characters who oppose the materialism she deplores."

"Mrs. Van Ness writes like an angel. She has a delicate, tireless capacity to capture emotion, temperament, changing moods and give to them all the shifting, transitory, moment-to-moment validity in precious words that they have in the real lives of real individuals. She views life with an impressive tenderness and courage, yet withal with clarity and an unflinching perceptiveness. In spite of all the dreadful things that befall Andrew and Catherine in 'The Indifferent Blade,' she (and they) are quite unwilling to accept the evil in the world at its face value. 'The Indifferent Blade' is one long intuition of the potency of the things of the spirit." F. H. Bullock

+ N Y Herald Tribune Wkly Bk R p4 Je 15 '47 800w

"Mrs Van Ness is most successful in her manipulation of the scenery. It is as if the glory of Vermont had been poured through several intense minds to merge the color and shape of different moods. But although there are enough inner tensions in this story, melodrama steps in once too often, and we are left with the feeling that the theme has been cut short in its prime." Isabelle Mallet

"[The] plot is negligible and the story is told slowly and in an almost detached manner. Nevertheless, it is highly interesting for its authentic portrayal of a lost way of life and for its rich cast of characters who are at the same time individualistic and typical. . . What that way of life was, with all its virtues and all its faults, is the real subject matter of 'The Moon Is Rising,' and after her 20 years' residence in America Miss Vegtel has presented it both lovingly and satirically as only an expatriated native could. . . Rather disappointingly, she omits details of the occupation, summarizing in a few pages the events of those five tragic years. Horses—Legends and stories 47-3061

Jonathan Feather, fourteen, ran away from home to go to sea, but he never got there. Instead he and the horse, Flying Ebony, patrolled the beaches of the south shore of Long Island, during the winter of 1848, and raced for help when they sighted a vessel in distress. The book is based on tales of a wonderful horse and his rider who belonged to a group working with insurance companies, a forerunner of our Coast Guard.

VIRGIL (PUBLIUS VERGILIUS MARO).
Georgics; tr. by C. Day Lewis; with an introd. by Louis Bromfield. 83p \$2.50 Oxford
873.1 47-3906

A translation of the Georgics of Virgil by the English poet C. Day Lewis, first published in England in 1940. "The present translation is line for line, and literal except where a heightening of intensity in the original seemed to justify a certain freedom of interpretation." He has avoided both the heroic couplet and the English hexameter and has used instead a rhythm based on the hexameter, containing six beats in each line, but allowing much variation of pace and interspersed with occasional short lines of three stresses." (N Y Herald Tribune Wkly Bk R)

"Those who have no Latin and wish to acquaint themselves quickly with the thoughts of the Roman poet-farmer will find this volume

helpful and enjoyable. The best translators of poetry are poets, for only the poetic mind can sufficiently grasp the feeling of the original lines to transfer some of it to the foreign version. Mr. Lewis, in his six-stress lines of colloquial movement, has reproduced, with practically literal meaning and with great beauty, Virgil's statements about agriculture, stock breeding, and gardening." "His work is completely scholarly, having the august approval of Dr. C. M. Bowra, himself probably the greatest living translator of verse, and of Cyril Connolly, certainly an arbiter of English. "Day Lewis has done a workman-like and readable job. Taking a leaf from Virgil's unfinished book, he has seen how the half-lines of the incomplete Aeneid added a wonderful, if accidental, grace to the long run of the hexameters; and he has deliberately broken his own six-beat lines with occasional short lines of three stresses." "If Von Hagen has somewhat overrated the uniqueness and ground-breaking character of his hero's archeological contributions he has, if anything, underrated the charms of the latter's narrative. For he has chosen to condense and paraphrase his hero's travels instead of letting the 'Incidents' speak for themselves. Surely, when so good a writer is involved, there is something to be said for the old-fashioned one-volume 'Life and Works' with its brief biographical sketch and copious excerpts from the writings. WALL, JOHN FURMAN. Breeding thoroughbreds. 180p il \$3.75 Scribner 636.1 Horse breeding Agr47-235

"Colonel Wall, a retired cavalry officer, has spent a lot of time around tracks and stock farms, and he claims that there is no rule for mating that is sure to produce a successful racer; nevertheless, he outlines the methods of many of the better-known establishments, and adds some entertaining sketches of the backgrounds of the leading racing families (equine, that is) in this country and England." WALLACE, WILLIAM STEWART. Dictionary of Canadian biography. 2d ed rev & enl 2v
\$20 Macmillan

920.071 Canada—Biography 46-4794

"The first edition of this work, reviewed briefly in Mudge, Guide to Reference Books, appeared in 1926, and the bulk of it was incorporated, as it stood, in the same editor's Encyclopedia of Canada, 1935-1938 (reviewed in Subscription Books Bulletin, October 1935 and October 1940). It is the authoritative, general dictionary of Canadian biography, exclusive of living persons, and is comparable in style to the Dictionary of National Biography and the Dictionary of American Biography. Articles in the Canadian work, however, are unsigned; a large proportion were written by the editor himself. . . Many new biographies have been added and more than half of these are of people who died before the first edition was published. The number of entries in the new edition is more than twice that of the old. Articles are brief, being far more condensed than those in the English and American Dictionaries. Full information is given, however, including occupation, place and date of birth, parentage, education, marriage and children, digest of career (with dates), date and place of death, publications." Subscription Bks Bul

"Supersedes all similar works, including the first [edition]. . . As in the first edition, the biographies are brief and to the point, but the references appended to each will be of the greatest value to those who may wish to read more fully about the lives of particular individuals. . . The enlargement has taken the

form of adding not only the names of distinguished persons who have died since the publication of the first edition in 1926 but also of including biographies of a number of people who might have been dealt with in the earlier edition but with respect to whom adequate information has only more recently become available. Revision has also included the correction of errors detected in the first edition and the adding of facts and references which have been provided by more recent scholarship. In format the large octavo paging of the first edition has been retained. The print is small but readable and the subject of each biographical sketch is made to stand out clearly by the use of larger and heavier type, thus facilitating speedy reference. The binding is handsome and substantial, giving a distinctive appearance on the shelf and promising durability under the heavy usage to which the volumes will be subjected in all larger libraries. One cannot suppress the wish, however, that for private libraries it might have been possible to publish a less expensive edition on thinner paper and in a single volume. This would have made the work more readily available to the very wide circle of readers which it merits." M. H. Long

Canadian Hist R 28:77 Mr '47 650w

"A check of sections A, B, and C shows an extensive revision of articles which appeared in the first edition. Only one or two in ten remain entirely unchanged, although sometimes the change is merely an addition to the bibliography. . . One could wish for more cross references, as the French names sometimes present difficulty to English readers. . . Format and binding are satisfactory. The dictionary of Canadian Biography is recommended for all libraries needing Canadian biographical material."

Rubens, Sir Peter Paul—Fiction 47-4660

A fictionalized biography of Peter-Paul Rubens, the seventeenth-century Flemish painter and diplomat. It gives an account of his rise from poverty to riches and power, but shows that his outward success was not matched by humanity in his personal relations. He takes the viewpoint that was advanced by Rogers Bordley, the art critic whose theory is that many so-called Rubens masterpieces were really the work of men in his workshop, chief among them Frans Snyders.

The result is eminently readable: the only criticisms which occur under this head are, first, the occasional use of a cliché . . . and second, the comparative poverty of the verse renderings of the Old Testament poetical quotations and what may reasonably be suspected to be quotations from early Christian hymns, all of which fall far below the level of their prose surroundings."

"It is not pleasant having to deal violently with so ardent and so decent-minded a book. . . . Mr. Watts's writings . . . propose only the same opinions held by thousands of people who teach in our universities, write for our middlebrow magazines, and swarm over the lecture circuits. But that is the point. The heresy is widespread, and therefore not unimportant. . . . Mr. Watts adds to all this a recklessness of language which sends any remaining exactitudes sprawling all over the shop. He admits in one place that he owes something to Chesterton. He owes a great deal; and nothing could be more ominous. Let anyone less than Chesterton at his best—and the challenge obviously includes Chesterton himself—attempt to be Chestertonian, and the result is lethal."

"Mr. Watts is almost certainly an inspired and inspiring teacher, but when he attempts, in the first four essays of the ten here reprinted, to give a reasoned basis for the inspiration that has carried him through thirty years of teaching, he becomes both confused and confusing. The net result recalls a dictograph record of a teacher's classroom remarks, played over later in the quiet of his study. . . . The two essays, 'Poetry and Childhood' and 'The Child and Literature,' contain some valuable hints for teachers on how to bring the horse to water, even if one can't make him drink, but platitude keeps breaking in. . . . 'The Aeneid and Human Life' alone redeems both Mr. Watts and his book. These fifteen pages, with their copious Latin quotations (translated in footnotes), give the profoundest analysis I have yet seen of the poignancy undeniably exhaled by the best passages of the Aeneid." "Like all really interesting travel writers, the author puts a lot of himself into his journals. "Mr. Waugh has a theory that the day of the travel book is over for a time—at any rate until the atmosphere of the world freshens enough to nourish another Doughty, another Burton. Perhaps he is right. As he points out there is little room for the tourist in a world full of displaced persons. "I must confess that I began my scrutiny of this volume with something less than an hospitably open mind. In the first place I own to a prejudice against synthetic books, and this appeared to be, and is, one, and in the second place I thought that Evelyn Waugh was being a little Olympian in implying that certain segments of his vernal journals of travel, delightful though they may be, should be considered as an inevitable portion of posterity's heritage. . . . When I had finished the 257th page I was aware that I had been continuously charmed and diverted, and that whatever was wrong with what Evelyn Waugh had left out of those books, there was nothing wrong with what he had left in." More intelligent and (fortunately for us) more articulate than most of his fellow travellers, he is in some sense typical of a generation made footloose by a combination of half-baked dissatisfaction and rather aimless curiosity. 'Each book,' he found on re-reading them, 'had a slightly grimmer air, as, year by year, the shades of the prison house closed.' It is no coincidence that his book opens in a bar and ends on a battlefield; and it is even more inevitable—because he is such an admirable writer—that in between them the going is extremely good." Personal narrative of a Hungarian Jew's experiences in World war II. A cabinet-maker by trade, Weinstock was living in Belgium when war broke out, and after several narrow escapes he joined the Belgian underground. In 1943 he was caught and sent to Buchenwald where he was held until the day of liberation, in April 1945.

"Though much has been written about life in a Nazi concentration camp, Mr. Weinstock's story is one that had to be told; and he has done so, simply and so dispassionately that even though there are details shameful and revolting, one appreciates his statement that 'I have made every effort to write this book so as not to cause pain.' He dispenses with

self-pity; he devotes little space to introspection; he gives you, unadorned, what it was like to live, hour by hour, in a hell where existence was reduced to the least human denominator and where merely to stay alive was a triumph." Gerold Frank

"Weismiller is at his best in his nature poetry: poems of fields and encroaching forests, of deer and foxes. . . To these poems I would add a few others, notably To the Woman in Bond Street Station. Significantly, these are poems with specific and localized referents. But when he writes of his emotions, particularly of his response to the natural phenomena of beauty, he becomes as a little stunned bird in the hand—one doesn't quite know what to do with him, so soft and palpitating is the feel of his reaction. In this respect, his two pressing needs to overcome are his incorrigible tendency to generalize, and his fondness for obvious 'poetic' phrases and situations." John Nerber

"The Faultless Shore" is the work of a young poet who has written for some years about nature, and this book continues in large part his earlier interest in foxes and snow, and trout and spring in the woods. He has a good eye for the appearance and interrelations of these creatures and scenes, and invariably they appear not as pattern or photograph but linked to some human concern which they themselves represent or whose meaning they evoke. . . What seem to be the later poems in the book are less expressly dominated by this outdoor world and turn more inward towards the meaning than out to the wild object. They are more subtle, more complicated, and also closer to the work of others of Mr. Weismiller's generation." Eugene Davidson

but especially it concerned the dominant women in their lives—the charming but coldly calculating Algeria, sure of her position among the socially elect; Belle, a weakling ruled by her mother; and the vibrant, high-spirited Julia, who paid a high price for the love she wanted." Publisher's note

"The Walls of Jericho' will furnish several hours of fast, exciting reading. It is a good tale, told with vigor and with spirit, packing into its pages all the drama and violence of the Great Plains Country as it emerged from the raw frontier days into the first suggestion of sectional consciousness. In his novel Wellman has caught the authentic accents of an especial era in American history, an era of abundant vitality, crass provincialisms and rich vulgarity. It is an era essentially American, an era which was one of the main fountain-heads of our national character." A. E. Gasaway

"Good drawing of town characters and points of view. But the main characters seem to lack the conviction that the minor characters carry."

Kirkus 14:578 N 15 '46 230w

"In spite of its length, 'The Walls of Jericho' is a difficult book to put down. Mr. Wellman underscores in it what he has already demonstrated in 'The Bowl of Brass'—his intimate knowledge of an era in America's past and his ability to recreate that era in terms of its habits, its political and social interests, its humors and its people. Not all he says of the era is pleasant. But all he says is true, and it is all said with skill and when compassion is due, with compassion." Jennings Rice

+ N Y Herald Tribune Wkly Bk R p5 F 2 '47 850w

"Mr. Wellman has painted a full-bodied canvas of a locale and an era which have been neglected in American fiction. The climax may be melodrama, but it is the melodrama to be expected in Jericho and Abilene and Fort Dodge. There are Kansans who will not like 'The Walls of Jericho' and who will deny that Mr. Wellman found his fictional city in their town, his fictional characters among their citizens. The denials will be in vain. There are many Jerichos in the Sunflower State and, in this reader's opinion, few better novels have ever been written of them." Hoffman Birney

N Y Times p5 F 2 '47 700w

"Mr. Wellman is not a thinker, nor, for that matter, is he especially deft at characterization, but he has written a readable and mildly homiletic yarn that has a credible atmosphere of violent political tensions and a carefully worked-in small-town background."

"It seems to me an over-wrought novel, like the over-wrought architecture of that Kansas town. Generally the reader is ahead of the story, even though it is crowded with events and complications. Like many of our novels, it doesn't quite seem mature. They are already building its sets in Hollywood. There is, however, a background in this novel, Jericho was a vigorous, jostling, windswept Kansas town. In the restless streets of Jericho the reader feels that a society was taking shape." The history and drama of the fabulous forty-niners who remained when the mines gave out to settle the sprawling Pacific Coast comprise material which Miss Wells has exploited to the fullest. The second part contains further reflections entitled: The happy turning.

"The first thing which strikes us in these hitherto unpublished essays is the senility of the author, who died this summer. These are the mumblings of an old, bitter and empty man. . . . "It is to the eternal credit of H. G. Wells, who spent most of his highly profitable seventy-nine years in a ceaseless pursuit of truth and a relentless attack on human stupidity, bigotry, and bogus morality, that his final conclusions on the nature of life as expressed in 'Mind at the End of Its Tether' yield not an inch to the terrors of the grave. Though he wrote the book after his doctor had informed him of his imminent death, he died with the full courage of his conviction that there is no particular reason for life, that the general prognosis for the future history of man is discouraging, and that the reign of Homo sapiens on this planet is probably nearly over unless he pulls himself up sharply by his own boot-straps." Anthony Bower

"There is nothing of the true Wells quality in the book. It is tired and petulant writing. One can but surmise that in his late seventies, suffering from physical ailments, H. G. "This intensely serious biological contribution to the scientific philosophy of the life process must be treated with due respect. Mr. Wells has possibly carried his distillation a trifle too far, so that the reader is left in doubt as to the real imminence of the danger which he fears. The book appears to have been written before the advent of the atomic bomb, and if we do not accept his fundamental concept, by a simple process of transference of ideas we are presented with a complementary picture of universal disaster which is of vital import to each member of a civilized race—and which moreover can be influenced by a voluntary adaptation of Man's will to exist." By all who regarded him as a prophet, this section may be read with bated breath; by others it may be read as a literary curiosity, and by all readers it will be found anything but 'escape' reading, since it approaches the depths of abysmal pessimism. . . . "Unfortunately the information is not always correct, and covers the same ground that many of his predecessors (notably Mr. Wintertich) have adequately described. . . There is a concluding chapter containing a list of Professor West's hundred favorite books. Here again inaccuracies distressing in the work of a scholar have crept in. . . "A history of American sea power which covers 170 years and yet devotes 40 per cent of its space to the events of the last five of those years must slight some of the developments, as well as events, that have seemed important to other writers. And no author in 1947 can hope to write definitively of the events of the last decade. . . . Bearing in mind these general criticisms, the authors of this history have done a creditable job. The book is interesting and is generally accurate. It should prove of value to the layman, and might easily serve as a textbook for college courses in naval history. The correlation with diplomatic and military history is often well done, and adds to the suggestiveness of the work. There is, however, some unevenness in the sections. For example, the chapters on the Revolution seem inadequate in comparison with the excellent section on the Civil War." R. A. Brown

"It is certainly not the best planned or organized text book in the world. White has been in the business a long time; he has a lot of information and a lot of memories. So he can't resist sliding off into somewhat extraneous anecdotes now and then... Also, some of the examples of news copy he cites run at too great length... Sometimes the book seems to me to be a bit too cute, sometimes a bit too clinical, occasionally too diffuse... Yet, the book, which White says he tried to write 'with radio technique in mind, even hoping that it was conversational enough to be read aloud,' gets over, in its rather casual way, a great deal of information. In the main it does so quite painlessly, too, and you may get a few laughs while you learn." Matthew Gordon

WHITE, WILLIAM ALLEN. Selected letters, 1899-1943; ed. with an introd. by Walter Johnson. 460p \$3.75 Holt

B or 92 Journalists—Correspondence, reminiscences, etc. U.S.—Politics and government—20th century 47-30060

"These letters, written from 1899 to 1943, have been carefully chosen from among the thousands in the White collection and represent the best personal writing of the famous Emporia editor. Here are found the honest, common-sense observations of the liberal Republican sage delivered in a humorous, lively style upon a variety of subjects. Concerned mostly with local and national politics, these epistles sketch the changing American scene through peace and war as viewed by a keen observer." Library J

"There are some regrettable aspects about this book: there are no letters before 1899; apparently the only letters used were those in White's carbons; there are mysterious excisions; many people are identified in the text of the letters; and of course these are 'selected' letters; but there is a long introduction and there are numerous background notes. This volume reveals an entertaining picture of a lovable American character." H. D. Catter

"This book is disappointing, though it is made up mostly of letters by him who seldom disappointed. The editing leaves much to be desired technically. The editor now and then carries coals to Newcastle by explaining matters which are lucidly enough set forth in the letters or which need no explanation whatsoever. More often he foregoes explanation of what is really in need of it. . . . And I certainly think the facetious letter (about White's own death), made the last, should not end the volume of a man as serious, even as sentimental, as the Sage of Emporia. Most of all, however, the editor seems to me to err in withholding information as to outcomes so cocksurely predicted in White's letters. There are useful things in the notes, but the performance is spotty and the judgment is far from uniformly circumspect. The greatest disappointment is not, however, of a technical sort. The point of view is itself disappointing. The editor of the letters would no doubt vigorously protest the charge that he patronizes his subject . . . [but] that is close to the impression the Introduction leaves." T. V. S.

"It is a pleasure to come upon a first volume of poems so unusual as Reed Whittemore's Heroes and Heroines. First of all, the book is distinguished for its readability. Although Mr. Whittemore does not write an easy poetry, his liveliness, variety of subject matter, wit, and technical virtuosity make one eager to pursue him from poem to poem. Second, the book introduces a talent that is not limited to one kind of verse: it is a talent that is lyric, critical and dramatic." R. L. Lowe

WHO'S important; in every field in all countries (a monthly service of biographies of world leaders assembled for the annual editions of the *Biographical Encyclopedia of the World*) January 1947—v.1—. \$7.50 per year pa Institute for research in biography 920

"The editor refers to *Who's Important* as a 'pre-publication service of the *Biographical Encyclopedia of the World*,' reviewed in *Subscription Books Bulletin*, July 1946 [Book Review Digest, 1947]. Each monthly number is to contain about five hundred biographies, later to be incorporated in the annual edition of the *Encyclopedia*. Hence *Who's Important* serves as a supplement to the *Encyclopedia*. Although the form and content of individual articles are basically those of the *Biographical Encyclopedia of the World*, there are several differences. The arrangement of *Who's Important* is in one alphabetical list, instead of in subject groupings; there are no photographs, and the articles are of nearly even fullness. There are none of the brief identification entries noted in the review of the *Encyclopedia*." *Subscription Bks Bul*

"The value of the service is its world-wide coverage. Only one-tenth of the inclusions are of the United States, and, of these, fully half were born elsewhere. There are no aids, such as cross references or pronunciations of difficult names. A useful feature, however, is the list of sixty-three Principal Countries of the World and the Heads of Their Governments which publishers state will be brought up to date each month. As only the first two issues were available at the time of review, final recommendation will be deferred until the Committee is able to examine further issues." *Subscription Bks Bul* 18:22 Ap '47 360w

The third, 1940-41, was the first to be published by the A. N. Marquis Company, publisher of *Who's Who* in America. The scope of the work has been considerably broadened since Marquis Company took over. The present edition includes names 'much in the public eye generally throughout the business world. The standards of admission divide the eligible into two classes (1) those selected on account of special prominence in their particular branch of business . . . (2) those included arbitrarily on account of positions held in commercial and industrial concerns of certain sizes or "rating" standings.' . . The brief biographies, arranged alphabetically, give date and place of birth, parentage, educational record, marriage and children, positions held, political and religious affiliations, membership and clubs and associations, and business and home addresses." *Subscription Bks Bul*

"Some names included will naturally be found in the general biographical dictionaries such as *Who's Who* in America and the *International Who's Who*, but this duplication is not extensive. *Who's Who* in Commerce and Industry is recommended for large libraries, public, college, and university, and for special libraries where such information is needed." + *Subscription Bks Bul* 18:42 Jl '47 600w

"This biographical dictionary is edited by Marion Dickerman and Ruth Taylor. . . The

major portion of the book, 390 pages, is devoted to biographies of persons prominent in union activities. The officers of the international trade unions were consulted in the selection of these people. Then follows fifty pages of sketches about individuals who 'deal with labor,' i.e., members of U.S. Department of Labor, Social Security Board, National War Labor Board, Maritime Commission, International Labour Office, state industrial and labor boards, American representatives of United Nations Economic and Security Council, etc. The biographies, alphabetically arranged in these two sections were compiled from questionnaires sent to the biographees. Information is of the usual who's who type with special emphasis on labor achievements and connections. . . There is a directory of international labor unions, A. F. of L., C. I. O. and independent, with the president and secretary's names and the headquarters address. Labor newspapers and trade union journals are given alphabetically by states with Canada included. A. F. of L. and C. I. O. educational research directors, national and local, are listed as are directors of university projects in worker's education and of labor schools. Federal labor legislation from 1883 to 1943 is highlighted in a brief chronology. John R. Steelman has edited a six-page glossary of labor terminology." *Subscription Bks Bul*

There are, however, occasional sketches of residents of states outside the

region, e.g., Emmett Pendleton of California,
who have no obvious connection with the Central
States." Subscription Bks Bul

"There are over 5000 entries, arranged in no particular order. The preface attempts to justify the lack of the standard alphabetical arrangement, but the advantages claimed do not make up for the awkwardness in use... Coverage is extremely uneven, as many editors and civic leaders in midwest cities are omitted in favor of others of minor prominence. However, the book contains names of many persons who are not listed in Who's Who in America. Although Who's Who in the Central States is intended to be a record of living men and women, there are at least fifty entries for individuals for whom the death date is given at the end of the sketch... While Who's Who in the Central States supplies biographical data which may meet local and regional demand, its many omissions limit its usefulness. It is recommended only for large libraries needing all available local material."

One may feel that Johannes's admiration for Niemöller was misplaced and find his simple religious approach a bit archaic. But one can only have profound respect for his purity and integrity, his modesty and his courage. And in an age when that minute particular, the human individual, has all but disappeared from the calculations of those who rule and misrule the world, and always in his name, Wiechert's abiding respect for 'God's image' is salutary."

"This biography, by Judge Wilkin, of fascinating, many-sided Cicero has three aspects. It supplies an excellently written, compact narrative of Cicero's career; the author discloses his own eminent fitness to be on the bench in his compassionate understanding that no man, however great, comes all of one piece. Secondly, the book suggests that Cicero's greatness derived from his qualities as a sagacious lawyer. Finally, it depicts Cicero's Rome as comparable with our America and suggests that, accordingly, Cicero's political views offer solutions of many of our problems. The second and third themes seem questionable to this reader, although he freely grants the folly of any dogmatic interpretation of events that occurred some two thousand years ago."

Mr. Williams' newest book—quite different from his earlier works—will be compared with that monumental work of the 1930's, 'Gone With the Wind,' which also had a Civil War setting. As a native South Carolinian, this reviewer can testify that scores of seemingly fictitious details are solidly based on fact. . . Yet, for all that, the story, like most historical romances lacks the feel of reality. Characters are moved from within at least as much as from without; but most of Mr. Williams's characters have no insides. They are moved through the plot like well played chessmen. Calder Willingham is a good and sharply arresting writer, and any young man who can conceive, execute, and sustain such a scene as Marquales's visit to the home of Perrin McKee, to say nothing of the rest of this vivid, brilliant, exasperated book, is someone to watch steadily." WILSON, EDMUND. Europe without Baedeker; sketches among the ruins of Italy, Greece, and England. 427p \$4 Doubleday

914 Europe—Description and travel 47-11406

"With places Mr. Wilson cannot go wrong. . . With people he is less absolutely certain. He never fails to inform them with vitality, but sometimes he falls into the same carelessness that made him discourse at length on Wordsworth as a typical Oxford man. . . Occasionally, Mr. Wilson's spitefulness and vindictiveness defeat their own purposes. . . Yet he is, as it were, the tailor's dummy of the whole civilized, entirely adult, completely American, 100 percent highbrow. In his brilliant and bitter introduction to the American number of Horizon, the English literary monthly, the editor, Cyril Connolly, says that occasionally the gap is closed between the public and the highbrow writer; this is shown by Thurber's drawing, Hersey's Hiroshima, and the essays of Edmund Wilson. And it is true: this too-good American is still the best European of them all." Anne Fremantle

"The opening chapter is the weakest. The picture of an unhappy middle-class childhood, of an unsympathetic stepfather, of a restless young wanderer who discovers he has the soul and voice of a poet, belongs to a genre that is fast becoming stereotyped in our literature. But once drink gets the best of 'Red' and he is forced to enter a sanitarium on an unspecified Pacific island, the tempo of the book changes and we enter a new world in more ways than one—this sudden shift of emphasis is a mannerism followed throughout the book." criminally stupid doctors and alienists are so far out of the ordinary world that it is hard to grasp their reality. After a chapter or two in which the author seems to be stumbling into the direct and forceful style he finally adopts, the book emerges as the most forceful of its kind to appear in over a decade." "A critical account of Robinson's growth as a poet, complete with analyses of many of his most important poems. It should be read along with a volume of his collected verse." (Publisher's note) Bibliography. Index.

"As an account of Robinson's poems [this book] is designed neither for the beginner nor for the Robinson scholar, and will satisfy neither. It is by turns naïve and erudite. New England Q 20:427 S '47 900w

"[This book] is strongest on the side of scholarly, technical analysis of craft; weakest on that of philosophical understanding, and therefore of interpretative insight. . . Professor Winters' estimate of much of Robinson's work tells us more about his own poetic preferences than it does about Robinson's creative intention and its expression. . . Professor Winters relates Robinson more closely to the American prose than to the poetic tradition. This is his most original critical point. For the rest, however the reader may disagree with Professor Winters' verdicts on individual poems, he is likely to find them provocative and stimulating. In this respect his little book is challenging. And it should do much to dispel the unjustified, legendary impression that Robinson's poetry is either 'difficult or obscure.'" + N Y Herald Tribune Wkly Bk R p35 My 11 '47 500w

"The book has the merits expected of it. But they are discounted by a carefully cultivated freak of presentation. Winters does not supply his reader with specimens of Robinson's verse; he rarely quotes a single word or phrase from his poet; which is not according to common sense or critical practice." J. C. Ransom
N Y Times p7 Ja 19 '47 900w

"In every way, the best analysis of Robinson yet written. Winters scrutinizes Robinson's technique and background sensitively but

firmly, and the result is a clarification of Robinson's virtues and weaknesses that should be of great assistance to those who have found the poet dry and impenetrable."

+ New Yorker 22:98 F 8 '47 50w

"Yvor Winters' is the most intelligent and most judicious of the critical surveys of Robinson's poetry. . . The book is well planned. The bulk of it is blocked out arbitrarily but efficiently into chapter discussions of the poems according to their length—short, medium, the three Arthurian, and 'the other' long poems. This essentially technical approach is more rewarding than the ideological would have been, since, as Winters is aware, Robinson's 'thought' is established rather than developed throughout his work. It is a more manageable, and therefore clearer, approach than the purely chronological. . . Himself a precise and intellectual poet, Winters has a tendency as critic of Robinson to elevate the supremely well-turned statement above the more emotional episode. I am thinking particularly of his inordinate admiration of Hillcrest in comparison to his lesser admiration of the profoundly moving Mr Flood's Party—the first a commentary of great talent, but the second a creation of genius. . . But I think we shall all have to agree that, by confirmation or persuasion, Winters' book comes brilliantly near to outlining, if not establishing, the Robinson cannon." W. T. Scott

801 American literature—History and criticism. Literary criticism 47-2236

A collection of the critical writings of a foremost American literary critic. They are: Primitivism and Decadence; Maule's Curse; and The Anatomy of Nonsense; all of which have been previously printed in small editions. To these has been added an essay on Hart Crane's The Bridge. Index.

"Taken together these essays comprise the most impressive statement of the ethical (as distinct from the merely didactic) view of poetry which has appeared since Babbitt's Rousseau and Romanticism. . . As Winters seems to derive [certain] values from the tradition of Aristotle and St. Thomas Aquinas, his work is often lumped with that of the modern Thomists. However, while he admits a kind of theism as a logical derivative from his critical and moral notions, Winters is not a Christian and bases himself on reason without faith. . . It is also worth observing that the Thomist is more hospitable than Winters to experimental and unorthodox writers like James Joyce. . . One is also disturbed by a certain rigidity in Winters' conception of the relations of the artist to society and the motion of history. . . But in making these distinctions I am anxious not to underestimate a body of critical writing which stands as a useful corrective to the irresponsibility of much of our 'new criticism.' This is an important book and it cannot safely be ignored." Malcolm Ross

in those errors caused by too great a rigidity in the structure of his intellect. . . . That is, it is clear that Mr. Winters's criticism is of great use in getting at American literature both for what it says or tries to say and for how it says or fails to say it. Why is it, then, that his criticism is not in general use? . . . The answer lies in the habits of our age. "In the case of Dr. Yvor Winters of Stanford University, one of America's best literary critics, one was impressed favorably by the earliest of his critical efforts, a book called 'Primitivism and Decadence.' . . . 'Maule's Curse' was probably more generally regarded as of outstanding worth than its predecessor, but again, its net effect was that of a seasonal phenomenon, and treasured on the shelves of a few perceptive lovers of books. More recently still, 'The Anatomy of Nonsense' appeared, being the third major volume of literary criticism to come from Dr. Winters' pen. . . . The value of these three books, which one had always supposed to be high, seems even higher now that they have been collected into one imposing volume which includes a long essay 'The Significance of "The Bridge,"' . . . "Sporting men do not often ask themselves why they are so constantly lured outdoors: what reward makes worth while the endurance of all the mosquitos, storms, frozen fingers and the rest? Bill Wolf does ask himself that question, and thoughtfully answers it, in one of the best chapters in his book. He believes that outdoorsmen really live, whether they are articulate about it or not, for certain magical moments that come to them . . . moments of 'sudden faint glimpses into understanding,' moments when a man has 'a sense of being on the verge of discovering a reason for everything.' It is this kind of awareness, plus the absence of exaggerated blood lust and over-technicality, that makes these modestly written reveries an attractive outdoor book." Alan Devoe

A table of contents precedes the sections on some countries giving names of universities included for that country and the pages upon which the lists of societies and institutions begin. "Administration of a public works program involves the major problem of setting a wage rate for recipients of this type of government assistance. During the nineteen-thirties, the problem of the wage rate was a crucial one in administering such vast programs as PWA and WPA. This volume specifically appraises the impact of the public works wage rates upon those paid in private employment. Buttressed by a great array of empirical data, as well as a theoretical analysis using model cases based on varying assumptions as to conditions of the labor market, the author makes an exhaustive analysis of the problem. WYND, OSWALD. *Black fountains*. 374p \$2.75
Doubleday

47-30179

A novel of life in Japan from 1938 to 1945. The chief characters are a young man and woman, educated in England and America, who return to their native land, marry there, and are drawn together into the inner conflicts of the social and political life of the country. The author, son of Scotch parents, was born in Tokyo and has lived most of his life there.

Booklist 43:224 Mr 15 '47

"Oswald Wynd, born in Japan and having the added advantage of knowing the language, unfortunately lacks the perspective, to make the country come alive for the reader. The background of his novel has little feeling of authenticity; the characters seem to miss the motivation which would give their actions conviction. . . . The effect is one of bareness, oddly unreal. The story might have been important had the author been able to interpret the Japanese in all their incongruities."

It does not aim to. It wants instead only to tell exactly what actually the fighting was like, and this it does superbly—better than anything else I have read. . . . I have cited this book as a modern kind of family album because it deals exclusively with the life and times of one group in a nation involved in a total war—the enlisted man doing the actual fighting—and deals with it in the spirit of our day. There is no lace here, no posing, no studio lighting, and no retouching. But there is sentiment. It is the modern sentiment, heartbroken and brooding, preoccupied with death, surrounding itself with a jungle of facts from which it cannot emerge with knowledge." Ira Wolfert

"Without knowing the original language it is impossible to say exactly, but the impression is that the author's knowledge of both Japanese and English have enabled him to render extremely fine and satisfying translations of these little 'versegrams' as he calls them. At any rate, he succeeds in offering many small poems with the extreme delicacy and poignancy which one has come to associate with this type of Japanese art. John Gould Fletcher has written a warm introduction and the author himself has contributed a rather pretentious and solemn preface full of propaganda for this verse form, which succeeds only in emphasizing the essential meagreness even while one admires the authors for doing much with little. All interested in Japanese art and especially poetry—closely allied to painting—will find these haiku charming. Limited appeal."

"Some of the poems in Mr. Yasuda's collection have a certain tonal quality and flitting beauty, but for the most part delicate moods are jarred by the translator's insistence on introducing rhyme. "No one could quarrel with Miss Yates's picture of the need for such efforts in even the nicest of old American communities or with the ideals and objectives for which she pleads in this novel. The earnestness and singleness of that purpose, however, somewhat detract from the effectiveness of the book as fiction; its people become subordinated to ideas. It seems likely that the book is based on the actual experience of an unusually intelligent, original and devoted teacher. If that is the case I am inclined to think that the story of her work could have been put across more effectively by a direct account of it rather than through a novel into which it intrudes didacticism and preachment." "The Yearbook of American Labor is sponsored by The Institute of Labor Studies, a non-profit organization founded to promote labor research, and is designed to bring together in one book contemporary labor developments and to record the contribution of American labor to World War II. This new Yearbook should not be confused with the apparently defunct American Labor Yearbook to which it bears no relation. The first volume, 'War Labor Policies' is an attempt to analyze the policies of American labor resulting from the very great changes which labor relations have undergone in the last two years. . . . Each of the chapters is signed and a list of the contributors with sufficient information about them to establish their fitness and their connection with the topic immediately at hand is given. The editors have attempted to exclude prejudice or bias and where this has been to some extent impossible, as in the case of the Little Steel formula, labor's objections are presented as well as government's viewpoint." "There is passion in the simplicity of Mr. Yeh's first novel, a simplicity that is the distillation of an adult and mature culture. His artlessness is of a piece with the artistic moderation that is traditionally Chinese. For despite its political background—autobiographical, one suspects—'Mountain Village' is not an ideological novel. Mother and Uncle Peifu and the young boy who tells the story are prototypal of political innocents the world over who serve as pawns of revolution. But what gives the Yangtse villagers stature is the fact that they are basic human beings, timeless and universal." A. F. Wolfe

"Though hardly a great book, it seems fairer and more honest in approach than most of those that have preceded it. . . . Yerby's plot, a contrived one, is inferior to his factual material, and many moments of pure melodrama spot the story; yet he offers more than that. . . . Much of the narrative is merely shrewd stuff, put together to formula, mixing sex and battle in the approved proportions. But, till a better

YOUNG, EMILY HILDA. Chatterton square. 321p \$3.50 Harcourt 47-31144

A study in contrasting characters, the scene of which is a town on the west coast of England in 1938 and 1939. Two families, the Frasers and the Blacketts, lived side by side in Chatterton Square. The Blackett house was presided over by a priggish father and a meek mother, and life was a weariness there. The Fraser house was full of life and warmth, with charming Mrs Fraser, her grown children, and Mrs Fraser's waspish but loving spinster companion as inmates. The effects of the coming war on these different households is traced in this quiet novel.

"Beautiful novel. . . It is akin to Mrs. Gaskell's Cranford. . . It differs from Cranford, however, not only in structure but in the fact that only one of its people is a spinster lady; almost every other person in the book is a facet of love. Chatterton Square is, indeed, one of the most lovable novels I have read since E. H. Young's last." Leo Lerman

"What seems striking to me in this well-written story is the astounding monotony of lower middle-class British lives. The mild little festivities of our Jane Austen friends seem positively giddy compared to the doings of the Blacketts and Frasers. . . Yet, strange to say, Miss Young handles her characters with such sure and sensitive insight that she arouses her readers' interest in them; it's a perfect book for a bed-table. But, after building up curiosity about Fergus, what he says to Rosamund on his nocturnal visit the author fails to divulge, and Miss Spanner, the p.g., is left baffled. 'Chatterton Square' is unmistakably the novel of a wise and talented woman. The style is feminine. The long, atmospheric sentences are sometimes almost reminiscent of Virginia Woolf, though sometimes more reminiscent of a slow freight train with a queer assortment of cars. The characterization is very feminine. Mr. Blackett, surely one of the finest inventions in contemporary fiction, is so exasperatingly true that only a woman could have written him." Donald Barr

"What lifts this above the level of even much more than ordinarily good fiction is the reaction of the Fraser family to the appeasement being practised in England's name, to the wilful blindness of so many of their fellow countrymen. I am not familiar with Miss Young's writings, so I cannot report on how this novel compares with her previous books; badly, I trust." D. S. Savage

"We cannot but think that the dating of the story was a mistake for this particular author. It is when we cross the road to the Frasers' house, where all is freedom, charm and light, that we lose the sense of reality and admit with reluctance that Miss Young is not at home in the contemporary world. The emotions of these young people are as unconvincing as their flaming resentment against the whole German race. This particular kind of patriotism is something which has not been characteristic of the English for a very long time. . . We must allow, of course, in comparing these two families for the great difficulty every novelist experiences in making the nice as convincing as the nasty. It is a difficulty that Miss Young herself always overcomes in her delightful portraits of spinster ladies. The Fraser household is enlivened, by one such."

"Jadie moves through these pages with dignity, with reader sympathy. Unfortunately Young's other characters are not as believable or as well drawn. He seems to be writing in two styles in this book. When he sticks to his clean, sharp, realistic style of writing he is very good; when he writes on the popular romantic vein, when he summarizes, skips into the minds of half a dozen characters and skips out again, when he uses words and phrases not in keeping with the story he has to tell, he is bad." The title poem, written in free verse forms, is the story of a bombing mission. The remainder of the book is made up of a collection of sonnets, some of them new, others culled from previous volumes.

"For all her passion and understanding, Hazel Zimmerman's work suffers from poetic competence; she avoids mediocrity yet attains no distinction. At her best she is skilful, but the influence of poets from Shakespeare to Millay is strong upon her. . . It is in the sonnet that Miss Zimmerman has won inordinate acclaim; occasionally, she achieves a brilliant line, only to spoil the effect by uncalled-for personification, the use of outworn words and phrases, archaisms, and a false sense of repetitive rhyme." I. L. Salomon

+ Sat R of Lit 30:24 Ag 9 '47 230w

"Miss Zimmerman's poetry is certainly as blatant, as perfervid and as exuberant as anybody could desire, and it may well repeat the popular success of 'The White Cliffs of Dover.' Miss Zimmerman's verse is mainly either declamatory . . . or lush. . . Whether, in fact, it is about her country or about her function that she is writing, Miss Zimmerman's tone is one of loud, profuse and uncritical self-admiration."

632.951 DDT (insecticide) 46-7890

"This book covers practically all of the information about DDT that is of interest to the general public. The authors first give a brief account of the tragic epidemics of the Middle Ages when diseases transmitted by rats, fleas and lice raged through whole populations; then they recount the history of the discovery and rediscovery of DDT, discuss its toxicity to warm-blooded animals, fish and insects, describe the various insecticide formulations in which DDT is the active ingredient, and show

how various types of insects such as lice, bed-bugs, flies, termites and agricultural insect pests may be controlled with them. The book contains many interesting accounts of experiments and experiences with DDT. It is written in a chatty style that is easy to read. For convenience, specific instructions for the use of DDT to control various types of insect pests are repeated in condensed form in the appendix." (N Y New Tech Bks) Index.

"The authors of this little volume have told in a simple and entertaining fashion the story of the now famous insecticide."

Novel based on the lives of the lesser fry of Hollywood. Pete Rands, assistant director for Popular-Bricker pictures tries to round up the once-great, still beautiful actress, Terry Evans. ZWEIG, ARNOLD. *Axe of Wandsbek* [tr. by Eric Sutton]. 428p \$3.50 Viking

47-11321

Novel picturing daily life in Germany under the Hitler dictatorship. Because of the consolidation of butcher shops in 1937, one Albert Teetjen consents to act as executioner for one day, in order to earn the money to carry on his business for a year. The results of that act are far-reaching and tragic.

"No encyclopedia contains a more extensive account of society under the swastika than does this sweeping fictional report of Hamburg, 1937-1938. That the story has been told many times before by correspondents, novelists, and analysts, that the chronology of Germany's infamy is as familiar to us as yesterday's headlines, that there exists a surfeit of literature describing and interpreting Nazism, do not seriously detract from the value of Zweig's ambitious summing up. . . Be forewarned. This is a grim, slow-moving, ponderous novel." G. D. Roscoe

A re-examination of the evidence for the resurrection of Christ from the tomb, which concludes that the evidence for it is incontrovertible. There is a chapter on the second coming of Christ, today. The author is an emeritus professor of Princeton Theological Seminary; and a Fellow of the Royal Geographic society. Index

"[There is] a chapter on the second (physical) coming of Jesus which will arouse controversy. 'All earnest Christians of every school of thought seem agreed,' he writes, 'that we face today an eschatological crisis.' But if this means the spiritual return of Jesus, who taught essentially and fundamentally a spiritual concept of the universe and a spiritual religion, all earnest Christians are hardly agreed." T.
